SLEEK DESIGN, SUPERIOR QUALITY

The coastal inspired Hatteras Bollard provides pedestrian and parking area lighting with a seaside flair, with lighthouse inspired louvers design. It is ideal for a wide range of applications including parking areas, walkways and landscape accents. The specially designed reflector cone optics offer excellently controlled, uniform lighting or opal LumaLens for soft lighting with uplight component.

The Hatteras is available with choice of LED arrays ranging from 9-37 watts in three color temperatures (3000K, 4000K and 5000K), producing up to 5,500 delivered lumens. The array features an aluminum board with copper circuits providing carefully controlled thermal management for long LED lifespans. The precision vandal-resistant, UV-stabilized polycarbonate optical lens produces a Type V distribution and protects the internal components. Easily replaces 70-100 Watt legacy HID systems, with an energy savings of 80% or more versus comparable Metal Halide systems. The Hatteras's durable one-piece sand-cast aluminum housing is finished with a weather-resistant textured powdercoat finish for years of service.
