SLEEK DESIGN, SUPERIOR QUALITY

The Contemporary AIB81Q Bollard provides pedestrian and parking area lighting and complements our AIB8T Light Column. Opal LumaLens diffuser offers excellently controlled, uniform lighting. It is ideal for a wide range of applications including parking areas, walkways and landscape accents.

The AIB81Q is available with choice of LED arrays ranging from 16-22 watts in three color temperatures (3000K, 4000K and 5000K), producing 1,470-2,850 delivered lumens. The array features an aluminum board with copper circuits providing carefully controlled thermal management for long LED lifespans. The precision vandal-resistant, UV-stabilized opal polycarbonate optical lens produces a Type V distribution and protects the internal components. Easily replaces 70-100 Watt legacy HID systems, with an energy savings of 80% or more versus comparable Metal Halide systems. The AIB81Q durable one-piece extruded aluminum housing is finished with a weather-resistant textured powdercoat finish for years of service.

AIB81Q Bollard Advantages:

- Up to 2,850 lumens
- 16-22 Watt LED Arrays
- Type V Distribution
- Opal LumaLens for Soft Lighting with Uplight Component
- CSA Listed
- 5 Year Limited Warranty
