- Type V Distribution
- Opal LumaLens for Soft Lighting with Uplight Component
- CSA Listed
- 5 Year Limited Warranty

SLEEK DESIGN, SUPERIOR QUALITY

The 12-foot LED Light Columns provide contemporary pedestrian lighting with a 50% soft uplight to delineate walls and landscape elements. Architects and Designers will use this luminous building element for accenting outdoor spaces in a wide range of applications including retail centers, schools and universities, public transit, park walkways and plazas. The low-glare SoftLED LumaLenses offer soft, uniform lighting.

The 24-48 Watt LED arrays, available in three color temperatures (3000K, 4000K and 5000K), produce up to 5,700 delivered lumens. The arrays feature aluminum boards with copper circuits providing carefully controlled thermal management for long LED lifespans. The vandal resistant, UV-stabilized polycarbonate LumaLens produces a Type V distribution and protects the internal components. The Light Column's durable extruded aluminum housing is finished with a weather resistant textured powdercoat finish for years of service. A heavy-duty cast aluminum clamshell base cover hides mounting hardware and is finished with the same durable powdercoat finish.
