1 piece minimum order

AIB9 Bollard Advantages:

- Up to 2,100 lumens
- 18 Watt LED Array
- Type III Distribution
- CSA Listed
- 5 Year Limited Warranty

SLEEK DESIGN, SUPERIOR QUALITY

The nautically inspired Swan Bollard provides pedestrian and parking area lighting with a seaside flair, with sleek lines reminiscent of graceful swans and gently rolling waves. It is ideal for a wide range of applications including parking areas, walkways and landscape accents. The specially designed optics offer excellently controlled, uniform lighting.

The 18 Watt LED array available in three color temperatures (3000K, 4000K and 5000K) produces up to 2,100 delivered lumens. The array features an aluminum board with copper circuits providing carefully controlled thermal management for long LED lifespans. The precision vandal-resistant, UV-stabilized polycarbonate optical lens produces a Type III distribution and protects the internal components. Easily replaces 70-100 Watt legacy HID systems, with an energy savings of 80% or more versus comparable Metal Halide systems. The Swan's durable one-piece sand-cast aluminum housing is finished with a weather-resistant textured powdercoat finish for years of service.
